

MAXX**ROBO
FORCE**

Easy-to-program wireless remote master controller.

Maxx's built-in storage compartments hold his accessories.

Maxx can light the way with his built-in spotlight, or use it to play some very special electronic games.

Maxx can grasp objects. His wrist pivots a full 360° and his arms move 270°.

Maxx moves forward and backward and steers with variable speed, at the touch of a button.

Built into Maxx is a digital alarm clock timer with LED display.

**ELECTRONIC MAXX STEELE™
PROGRAMMABLE ROBOT
No. 48079
The Personal Robot with Wireless
Remote Control**

He walks, he talks, he plays games; he has a fully-articulated, motorized grasping claw, moving arms and wrist, total mobility, storage and carry compartments and an electronic computer brain. He is Electronic Maxx™ and he is the dream toy of the future!

Remove his hand-held master controller

from the top of his head and you control his action. You make him speak, play games and music at the touch of the keyboard. His wireless remote control, programmable memory and "Learn Mode" enable you to program a sequence of actions and activities, and then Maxx will perform them again and again – by himself, from memory!

Maxx knows over 140 words, music, the time (via an internal electronic alarm clock that allows him to activate at a predetermined time) and some very exciting and unique electronic games (including

"Moon Ball™" and "Force Field™") that you can play against him or another human being. In fact, Maxx can do almost anything a human being can! Complete with instruction manual and built-in rechargeable battery pack.

One 9-volt battery required (Not included.)

For ages 8 years and up.

Pack: 1 piece Wgt.: 34 lbs. Cube: 9
