

The Transformers® Autobot Mini-Vehicle Assortment

5710

These mini-vehicles are small but swift Autobots who act as messengers and spies. Five new mini-vehicles join the Autobot cause, ready to battle the Decepticons. Push in the sides, swing in the arms, fold in the legs . . . they transform from robots to mini-cars, trucks, and aircraft!

Each Autobot Mini-Vehicle is packaged as a robot on a blister card. All include a bio, Tech Specs chart and special liquid crystal Transformer logo as proof of authenticity. Assortment includes four each of hovercraft, plane and tank, three each of dune buggy and space ship and one each of continuing styles.
