

All six Constructicons
join together to form
the mighty Devastator!

The Transformers® Constructicon Assortment

The Constructicons create the Decepticon fortresses, energy plants and massive energy-recovery installations. Swing down the cab, pull out the arms and lift up the head... each transforms from a construction vehicle to robot and back. And for special assignments, all six Constructicons join together to form the mighty Devastator! Each Constructicon is packaged individually on a blister card containing attachable weapons and accessories, character bio, and Tech Specs chart. Each one includes the special liquid crystal logo and is sold individually to encourage collectibility. Assortment includes four of each Constructicon.
