## The Transformers® Insecticon Assortment

5720

These creepy creatures from the insect world transform into terrifying robots to attack the Autobots. Insecticons fight by using forms of mind control or "electricity" on their subjects. Swing back the wings, open the chests and fold down the heads to transform from insects to robots.

Each is packaged as an insect with attachable weapons, character bio, Tech Specs chart and decoder. The special liquid crystal logo provides proof of authenticity. Assortment includes eight of each Insecticon.
