

Shockwave

5799

5799

The Transformers® Decepticon Military Operations Commander

Cold and calculating, Shockwave seeks to overthrow Megatron's position of supremacy over the Decepticons. Pull out the handle, swing open the barrel and flip out his feet . . . and he transforms from a laser gun to a brutal robot. Pulsating laser-action lights and two ultra-laser sounds add excitement to this dynamic weapon. Shockwave is packaged with a magnetic impulse defuser, bio card, Tech Specs chart and decoder. Rub the secret liquid crystal logo to prove Transformer authenticity. Operates on one 9 volt battery (not included).
