## Flying Submarine (S.H.A.R.C.)

6049

This Submersible High-speed Attack and Reconnaissance Craft prowls the ocean depths and strategically positions itself so that even the most sophisticated COBRA sonar equipment can't detect it. With a movable action lever, DEEP SIX launches torpedoes just in time for S.H.A.R.C. to elude the enemy and "fly" away. Bomb can be replaced with figure. Cockpit door pivots and wing guns elevate. Driver DEEP SIX surfaces and submerges with bellows action.
