

G.I. Joe® Armored Recon Patrol Vehicle (ARPV)

1873

Realistic battle action (and heavy store traffic) begin with this battery-powered military ARPV that has plenty of built-in action and operates on a 6-volt rechargeable battery. This tough rider has authentic armored vehicle body styling, with a molded, front-mounted, battery-operated laser blaster that features electronic light and sound, too! Levers control forward, reverse, left and right field movement. Buttons on control levers "fire" the laser blaster and control the drive power. Front wheel is caster type for stability and quick turns. Power-driven wide track rear wheels provide even more stability. Other features include a contoured seat for comfort and G.I. JOE® decorations, with simulated dash controls. Comes with a 6-volt rechargeable battery and battery recharger.

Ages 4 to 7 (Maximum weight 55 lbs.)

Pack: 1 Weight: 26 lbs. Cube: 6.5'
